

Job Site Safety Training Guide

Topic: General Safety Rules & PPE

Audience: EV Charger Installation Crews (Parking Garages & Lots)

Estimated Reading Time: 8–10 minutes

Page 1: General Safety Rules

Why It Matters: Safety is everyone's responsibility. Whether you're drilling, trenching, or installing EV chargers, following basic safety rules prevents injuries and saves lives.

Start Every Day with a Safety Check

- Check in with your supervisor before starting work.
- Attend the daily safety briefing.
- Review the Job Hazard Analysis (JHA) for your tasks.

Secure the Work Area

- Use cones, caution tape, and signage to mark off your work zone.
- Keep walkways and drive lanes clear of tools and debris.
- Never block emergency exits or fire lanes.

Know Your Emergency Procedures

- Locate first aid kits, fire extinguishers, and emergency exits.
- Know who the site safety lead is.
- Report any injury or near miss immediately.

Communicate Clearly

- Use radios or hand signals when working near vehicles or equipment.
- Always make eye contact with drivers before crossing paths.
- Speak up if something feels unsafe—no retaliation is allowed (Cal/OSHA §3203).

Use Tools Safely

- Inspect tools before each use.
- Report damaged tools—don't use them.
- Store tools securely when not in use.

Daily Safety Check Steps

Step	Action
1	Check in with supervisor
2	Attend safety briefing
3	Review Job Hazard Analysis

Page 2: Personal Protective Equipment (PPE)

Cal/OSHA Standard: Title 8 §3380–§3411

Required PPE for EV Charger Installations:

- Hard Hat – Protects against falling objects and head injuries.
- Safety Glasses – Shields eyes from dust, debris, and sparks.
- High-Visibility Vest – Makes you visible to drivers and equipment operators.
- Work Gloves – Prevents cuts, burns, and electrical contact.
- Steel-Toe Boots – Protects feet from heavy objects and punctures.

PPE Items and Their Purpose

Item	Purpose
Hard Hat	Protects against falling objects and head injuries
Safety Glasses	Shields eyes from dust, debris, and sparks
High-Visibility Vest	Makes you visible to drivers and equipment operators
Work Gloves	Prevents cuts, burns, and electrical contact
Steel-Toe Boots	Protects feet from heavy objects and punctures

PPE Inspection Checklist:

- Check for cracks, tears, or wear.
- Make sure PPE fits properly.
- Replace damaged gear immediately.

Storage & Care:

- Store PPE in a clean, dry place.
- Don't leave gear in direct sunlight or wet areas.
- Clean PPE regularly to maintain effectiveness.

If You Don't Have PPE:

- Stop work immediately.
- Notify your supervisor.
- Employers are required to provide PPE at no cost (Cal/OSHA §3380).

Safety First, Always: Your safety gear is your first line of defense. Wear it. Check it. Respect it.
