Policy Statement

The personal safety and health of each employee of Corp CHARGIE and Chargie, LLC is of primary importance. The prevention of occupational injuries and illnesses is of such consequence that safe working conditions and practices will be given precedence over operating productivity whenever necessary.

We will maintain a safety and health program conforming to the best practices of organizations in our industry. Our program will emphasize injury and illness prevention on the part of both management and employees. We promote cooperation in all safety and health matters, not only between management and employee, but also between each employee and his or her co-workers. Only through a cooperative effort can a safety program in the best interest of all be established and preserved.

Our objective is a safety and health program that will reduce injuries and illnesses, and that surpasses the best experiences of other operations similar to ours.

Responsibility

I, Zach Jennings, delegate the responsibility for the administration of this organization's IIPP to **Manfredo Aguilar *OR the managers and supervisors who are in charge of employees in their respective work areas.*** Responsibilities for protecting the safety and health of all employees are assigned according to the *Plan Administration* section of this IIPP.

Corp CHARGIE, LLC
Chargie, LLC
CEO

Date

Compliance

Managers and supervisors are responsible for establishing and maintaining good health and safety practices. To ensure compliance, the following procedures will be implemented by managers and supervisors:

- Inform all employees of the provisions of this IIPP.
- Evaluate the safety performance of all workers through job hazard analyses (JHAs), observation, interviews, and periodic testing.
- Recognize employees for following safe and healthful work practices.
- Train employees as necessary to remedy any deficiencies in employee safety performance.
- Take disciplinary actions as appropriate with employees for failure to follow safe and healthful work practices.
- Adhere to an antidiscrimination policy for employees reporting safety and health concerns.

Code of Safe Practices

All employees will comply with general workplace safety practices in addition to any site- or operation-specific work practices. See Attachment #1 for a copy of the *Code of Safe Practices* checklist.

Disciplinary Action

All employees, including all levels of management, will be held accountable for obeying site safety and health rules. The following four-step disciplinary policy will be applied to everyone by the appropriate level of supervisor:

1. Oral warning
2. Written reprimand
3. Suspension
4. Dismissal

Visitors, including contractors who violate safety and health rules and procedures, will be escorted from the site. Should the disciplined person request a review of the disciplinary action, **Robyn Chu** will review the situation and make a recommendation to management, which reserves the right for final decision.

Antidiscrimination Policy

It is the policy of this organization not to discriminate against any employee who reports a work-related fatality, injury, or illness, files a safety and health complaint, requests access to injury and illness records, or otherwise exercises any rights afforded by occupational safety and health laws.

Communication

All managers and supervisors are responsible for communicating with all workers about occupational safety and health in a form readily understandable by all workers. Our communication system encourages all workers to inform their managers and supervisors about workplace hazards without fear of reprisal.

Management ensures that at least several avenues exist for employee involvement in safety and health decision making and problem solving. These avenues include the following communication systems:

- New worker orientation, including a discussion of safety and health policies and procedures
- Review of our IIPP
- Training programs
- Regularly scheduled safety meetings
- Posted or distributed safety information
- A system for workers to anonymously inform management about workplace hazards

Management encourages employees' involvement and devises appropriate recognition for outstanding employee participation.

Safety Meetings

For employees, management will conduct safety meetings **quarterly** and more often to discuss safety issues as they come up. A safety meeting includes all employees in a work area and at least one manager or supervisor to ensure that all appropriate issues are addressed. A manager or supervisor will cover one or more of the following activities:

- Review key safety topics.
- Review safety and health inspection reports to help correct safety hazards.
- Evaluate the accident investigations conducted since the last meeting to determine if the cause(s) of the unsafe situation was identified and corrected.
- Review any observed unsafe practices and ways to correct them.
- Reaffirm the need for safe work practices.
- Answer any questions that employees may have about a safe practice, equipment operation, or other safety-related issues.

Formal safety meetings may be supplemented by "toolbox talks" of 10 or 15 minutes at the start of a work shift, or at other times as designated by a supervisor.

Hazard Assessment

A competent person will conduct hazard assessments and safety inspections for each work project and activity. Periodic inspections to identify and evaluate workplace hazards will be performed by competent person(s) in the following areas of the workplace:

Competent Person	Work Area	Inspection Frequency
Manfredo Aguilar	Office, kitchen, restrooms, shower, conference rooms, offices, copy area	weekly
George Corona	Warehouse, parking ramp, parking area, fitness center	weekly

The hazard assessment and subsequent inspections will be conducted when one or more of the following conditions apply:

- When the IIPP is initially established
- When new substances, processes, procedures, or equipment which present potential new hazards are introduced into the workplace
- When new or previously unidentified hazards are recognized
- When occupational injuries and illnesses occur
- Whenever workplace conditions warrant an inspection

See Attachment #2 *Job Hazard Analysis Worksheet (simple)* for a copy of the initial hazard assessment for a single work activity that is common to multiple work areas. For an activity with complicated tasks that require multiple steps, use Attachment #3 *Job Hazard Analysis Worksheet (detailed)*.

Management encourages employees to report hazards to their supervisor or **facilities manager Manfredo Aguilar**. Employees will use the *Employee Report of Hazard* form for this purpose. See Attachment #4 for a copy of the *Employee Report of Hazard*.

Accident/Exposure Investigations

If an employee sustains a work-related injury, the employee or a co-worker will immediately notify the supervisor of the work-related injury or illness, and the supervisor will ensure the injured or ill employee receives prompt medical treatment. The employee will complete the employee part of the accident report form. If the date and time of the injury or illness cannot be determined, such as an injury caused by cumulative or repeated stress, the date of the last time the employee worked is entered on the form.

See Attachment #5 for a copy of the *Accident Investigation Report*.

Any person who observes or causes damage to property or equipment will immediately report such damage to a supervisor.

Injury to Visitors

Injuries sustained by visitors at this facility must be reported to **Liz Goldman, Zach Jennings** or **Manfredo Aguilar**. Injured visitors will be immediately provided medical treatment, if necessary. The causes of injuries to visitors will be investigated through the same processes as for an employee accident investigation.

Near-Miss Incident

The investigation procedures for near-miss incidents will follow an abbreviated outline derived from the *Accident Investigation Report* procedures.

See Attachment #6 for a copy of the *Near-Miss Investigation Report* form.

Hazard Correction

Corrective actions recommended in the hazard assessment and inspection report(s) and approved by management will be implemented. Supervisors will inform employees of the hazards and corrective actions, and conduct employee training before the commencement of related tasks.

Management will implement the following protective measures when hazardous conditions are present:

1. Correct the hazard when observed or discovered with administrative controls, engineering controls, training, and/or PPE.
2. Remove workers from an area where an imminent hazard is present that cannot be corrected without endangering employees or property.
3. Provide workers who will correct the hazard with appropriate hazard controls and PPE.

Personal Protective Equipment

Manfredo Aguilar will provide the necessary PPE to ensure the well-being of the employee. These items include:

- Safety glasses
- Gloves
- Aprons

- Safety shoes
- Respiratory equipment
- Weight belts

Supervisors will review work areas and operations and provide the necessary protection. Employees are expected to wear such PPE. Failure to do so may lead to discipline up to and including termination.

Training and Instruction

All workers, managers, and supervisors will receive training and instruction on general and job-specific safety and health practices. Training and instruction will be provided:

- When the IIPP is initiated
- When new employees are hired
- When existing employees are reassigned to jobs for which they have not received prior safety training
- Whenever new substances, procedures, processes, equipment, or facilities are introduced and represent a new hazard
- When **CHARGIE** is aware of a new or previously unrecognized hazard
- To supervisors concerning all hazards to which employees under their direct supervision may be exposed
- To employees concerning hazards specific to their job assignment(s)
- On a regular basis to reinforce existing safety and health procedures

General job safety and health training will include:

- Implementation and maintenance of this IIPP
- Emergency action and fire prevention plan
- Provisions for medical services and first aid, including emergency procedures
- Prevention of musculoskeletal disorders, including proper lifting techniques
- Proper housekeeping, such as keeping stairways and aisles clear, work areas neat and orderly, and promptly cleaning up spills
- Prohibiting horseplay, scuffling, or other acts that tend to adversely influence safety
- Proper storage to prevent stacking goods in an unstable manner and storing goods against doors, exits, fire extinguishing equipment, and electrical panels
- The proper reporting of hazards and accidents to supervisors
- Hazard communication, including worker awareness of potential chemical hazards and proper labeling of containers
- Proper storage and handling of toxic and hazardous substances, including prohibiting eating or storing food and beverages in areas where they can become contaminated

In addition, we will provide specific instructions and training to all workers regarding the hazards that are unique to their job assignments, including wearing and caring for PPE, if required for the job.

Recordkeeping

Manfredo Aguilar will maintain all records related to this Plan. Unless otherwise noted, the records will be kept **3947 Landmark Street, Culver City, CA. 90232**. All records are available for employee and regulatory agency review upon request.

Safety meeting records. Each safety meeting will be documented with an attendee sign-in sheet and a meeting agenda that includes the supervisor's name, date of meeting, and subject(s) covered. This documentation will be maintained for at least 1 year. **Manfredo Aguilar** is responsible for maintaining these records.

Inspection records. All inspection records and forms will be kept for 1 year by **Manfredo Aguilar**.

Illness and injury reports. Our organization must record all employee injuries and illnesses on the following three forms:

- Cal/OSHA Form 301
- Cal/OSHA Form 300
- Cal/OSHA Form 300A

Following are instructions for completing the Cal/OSHA forms:

1. All supervisors are required to fill out the Cal/OSHA Form 301—Injury and Illness Incident Report for each injury or illness that is considered recordable under Cal/OSHA regulations. The supervisor must fill out the form within 7 calendar days after finding out about the injury or illness. A copy of this record will be sent to **Manfredo Aguilar**. The supervisor will keep these records for 5 years.
2. **Manfredo Aguilar** is responsible for entering the information on the Cal/OSHA Form 300—Log of Work-Related Injuries and Illnesses within 7 calendar days of receiving notice of a recordable illness or injury. This form will be retained for 5 years even if there are no recordable injuries or illnesses.
3. At the end of each calendar year, **Manfredo Aguilar** will review the Cal/OSHA 300 Log to verify that the entries are complete and accurate. This information will be summarized and entered on Cal/OSHA Form 300A—Summary of Work-Related Injuries and Illnesses. The Summary will be signed and dated by a company executive and will be posted in a conspicuous place available to all employees from February 1 to April 30. It will be mailed to each employee who does not normally report at least weekly to the worksite where the annual summary is posted.

Accident investigation records. **Manfredo Aguilar** will maintain comprehensive accident/injury records and will maintain records of all accident investigation reports and data for **three years**.

Code of Safe Practices

GENERAL

1. All persons shall follow these safe practice rules, render every possible aid to safe operations, and report all unsafe conditions or practices to the foreman or superintendent.
2. Foremen shall insist on employees observing and obeying every rule, regulation, and order as is necessary to the safe conduct of the work and shall take such action as is necessary to obtain observance.
3. All employees shall be given frequent accident prevention instructions. Instructions shall be given at least every 10 working days.
4. Anyone known to be under the influence of drugs or intoxicating substances that impair the employee's ability to safely perform the assigned duties shall not be allowed on the job while in that condition.
5. Horseplay, scuffling, and other acts that tend to have an adverse influence on the safety or well-being of the employees shall be prohibited.
6. Work shall be well planned and supervised to prevent injuries in the handling of materials and in working together with equipment.

7. No one shall knowingly be permitted or required to work while the employee's ability or alertness is so impaired by fatigue, illness, or other causes that it might unnecessarily expose the employee or others to injury.
8. Employees shall not enter manholes, underground vaults, chambers, tanks, silos, or other similar places that receive little ventilation, unless it has been determined that is safe to enter.
9. Employees shall be instructed to ensure that all guards and other protective devices are in proper places and adjusted, and shall report deficiencies promptly to the foreman or superintendent.
10. Crowding or pushing when boarding or leaving any vehicle or other conveyance shall be prohibited.
11. Workers shall not handle or tamper with any electrical equipment, machinery, or air or water lines in a manner not within the scope of their duties, unless they have received instructions from their foreman.
12. All injuries shall be reported promptly to the foreman or superintendent so that arrangements can be made for medical or first aid treatment.
13. When lifting heavy objects, the large muscles of the leg instead of the smaller muscles of the back shall be used.
14. Inappropriate footwear or shoes with thin or badly worn soles shall not be worn.
15. Materials, tools, or other objects shall not be thrown from buildings or structures until proper precautions are taken to protect others from the falling objects.

Safety Committee Tips and Considerations

Safety committees are advisory. A Safety Committee is an organizational structure where members represent a group. This gives everyone a voice but keeps the meeting size to an effective number of participants. Safety committees should not have any regulatory enforcement powers and therefore should never be assigned such responsibilities; they are advisory only. All enforcement of safety and health rules and policies within the company is the responsibility of designated employer representatives, such as supervisors.

Safety committees at multiple work sites. Companies with multiple work sites may have more than one safety committee. Each committee can operate at a single geographic location comprised of a building, group of buildings, and all surrounding facilities. The location would have both management and workers present, and one or more employees at the location would have control over a portion of a budget and would have the ability to take action on the majority of the recommendations made by a safety committee. An employer's auxiliary, mobile, or satellite locations may be combined into a single, centralized committee. This centralized committee must represent the safety and health concerns of all the locations.

Review and incorporate state regulatory requirements. This plan is based on federal requirements and/or best practices. Some states have laws and regulations that are stricter than federal requirements and may impact how you customize this plan. Click on the link below to view state requirements on this topic. After reviewing the specific information for your state(s), you can edit the plan accordingly.

Corp CHARGIE, LLC and Chargie, LLC Safety Committee Plan

Program last updated: 2/29/2020

Policy Statement

Corp CHARGIE, LLC and Chargie (“CHARGIE” collectively) is dedicated to protecting the safety and health of its employees. **CHARGIE** has established a safety and health program to prevent injuries and illnesses due to hazards. Employee involvement at all levels of the company is critical for us to be successful in this effort. To accomplish this task, a joint worker/management safety committee has been established to bring workers and management together in a nonadversarial, cooperative effort to promote safety and health in the workplace. This safety committee will provide information and recommendations to management about occupational safety and health conditions and practices at **CHARGIE**, and will provide a forum for information exchange.

Program Administration

Table 2 provides contact information for the safety committee.

Safety Committee Contact Information

Task	Name, job title, and/or department	Phone
Committee Administrator	Manfredo Aguilar	Work phone: (424)274-7416 Cell phone: (310)490-7587
Committee Chairperson(s)	Zach Jennings	Work phone: (310)929-4825 Cell phone: (310) 621-0024
Committee Members	Liz Goldman	Work phone: (323-446-3582 Cell phone: (310)990-2383

Committee Administrator. The Committee Administrator will support the activities of the Safety Committee and provide training for new members and refresher training as necessary to ensure that members are qualified and informed to carry out their responsibilities.

Committee Chairperson(s). The Committee Chairperson(s) will

- Prepare the agenda for each meeting.
- Arrange for the meeting place.
- Notify members of the meeting.
- Set time schedule for the meeting.
- Arrange all seating for members.
- Review previous minutes and material for meeting.
- Conduct the meeting.

Committee members. Committee members will carry out the committee responsibilities and functions as directed by the Committee Chairperson(s).

Safety Committee Organization

A safety committee is established as a management tool to recommend improvements to the [company name] workplace safety program and to identify corrective measures needed to eliminate or control recognized safety and health hazards. The number of safety committee management representatives will not exceed the number of employee representatives.

Committee Responsibilities and Functions

The safety committee will:

- Help management evaluate the effectiveness of control measures used to protect employees from safety and health hazards in the workplace.
- Help management review and update the workplace safety and health program by evaluating employee injury and accident records, identifying trends and patterns, accident investigation findings, inspection findings, and employee reports of unsafe conditions or work practices.
- Accept and address anonymous complaints and suggestions from employees.
- Help management formulate corrective measures to prevent recurrence of injuries, near-misses, accidents, and property damage.
- Promote safety and health awareness and co-worker participation through continuous improvements to the workplace safety program.
- Assist management in monitoring workplace safety education and training to ensure that it is in place, that it is effective, and that it is documented.
- Identify unsafe work practices and conditions and provide safety recommendations to **Manfredo Aguilar, Workplace Experience Manager, or Zach Jennings, Facilities Manager** regarding health and safety issues.
- Review incidents involving work-related fatalities, injuries and illnesses, and complaints by employees regarding safety or health hazards.
- Review the employer's work injury and illness records, other than personally identifiable medical information, and other reports or documents related to occupational safety and health.
- Conduct inspections of the worksite at least weekly and in response to complaints by employees or committee members regarding safety or health hazards.
- Conduct interviews with employees in conjunction with inspections of the worksite.
- Observe the measurement of employee exposure to toxic materials and harmful physical agents.
- Establish procedures for exercising the rights and responsibilities of the committee.
- Make recommendations on behalf of the committee, and in making recommendations, permit any members of the committee to submit separate views to the employer for improvements in the employer's safety and health program and for the correction of hazards to employee safety or health. The recommendations are advisory only and the employer will retain full authority to manage the worksite.
- Accompany, upon request, the regulatory agency representative during any physical inspection of the worksite.

Management will provide written responses to written recommendations submitted by the safety committee.

Committee Meetings

Safety committee meetings are held **quarterly** and more often as determined by management and the safety committee. Each committee member who is not a salaried employee will be compensated at his or her hourly wage when engaged in safety committee activities.

Committee Membership

The Safety Committee consists of: Manfredo Aguilar, Liz Goldman and Zach Jennings

- Committee Chairman or designee
- At least two members at **CHARGIE** work sites with 20 employees or less

Committee Procedures

Agenda items may be submitted to the chairperson by any member and will be distributed to members at least one (1) week before the next scheduled meeting.

Issues to be brought before the committee for discussion will be broad in scope or be those referred by employees or departments that have not been or cannot be resolved at the supervisor or management level. Committee recommendations will be forwarded to **Zach Jennings, Facilities Manager.**

Option 1—Hazard Assessments

Option 2—Inspections

Option 3—Accident Investigations

[Option 1]

Hazard assessments. The committee will assist **CHARGIE** to conduct evaluations of existing or potential occupational hazards, and make written recommendations to minimize or eliminate the hazards where feasible. The committee will:

- Establish procedures for workplace evaluations and inspections by the safety committee inspection team to locate and identify safety and health hazards.
- Conduct workplace inspections at least **weekly**.
- Recommend to the employer how to eliminate hazards and unsafe work practices in the workplace.

[Option 2]

Inspections. The committee inspection team or designees will conduct safety inspections as directed by management. The person or persons designated to carry out inspection activities will be selected by management and will receive training in hazard identification in the workplace.

The inspection team will include management and employee representatives and will document in writing the location and identity of the hazards and make recommendations to management regarding correction of the hazards

The designated inspection person(s) will inspect mobile worksites or locations and activities that do not lend themselves to the inspection schedule as often as safety and health rules require and/or the committee determines is necessary.

[Option 3]

Accident investigations. Safety committee members who have been trained in accident investigation procedures will participate in accident investigations upon the request of management.

Recordkeeping

Minutes that include a record of attendance will be made of each meeting, which the employer will review and maintain for **three years**. Copies of minutes will be posted or made available for all employees and will be sent to each committee member. All reports, evaluations, and recommendations of the safety committee will be made a part of the minutes of the safety committee meeting.

Committee Member Training

Manfredo Aguilar will ensure that safety committee members receive appropriate training to carry out their committee responsibilities.

Committee members will have access to copies of safety and health laws, regulations, and any company policies that apply to the particular work site and be given verbal instructions regarding their use.

All safety committee members will receive training and information regarding:

- Safety committee purpose and operation
- Basic requirements of workplace safety rules and their application
- Methods of conducting safety committee meetings
- Hazard identification in the workplace
- Principles regarding effective accident and incident investigations
- Employee and employer rights and responsibilities under applicable state and federal employment and labor laws or rules
- Injury and illness recordkeeping requirements
- Most common causes of on-the-job accidents at the work site
- Committee procedures

Did the accident result in the death of one or more persons, or hospitalization of three or more? ☐ Yes ☐ No

Was medical treatment provided? ☐ Yes ☐ No

Was this a recordable injury or illness? ☐ Yes ☐ No

If so, describe the treatment _____

Did the employee lose time from work? ☐ Yes ☐ No

Was the employee placed on restricted or light duty, or transferred to another job? ☐ Yes ☐ No

If so, describe:

Amount of property damage: \$ _____

Accident Account

Describe the accident (in the sequence that events occurred):

Describe the extent of injury or illness and body parts affected/property damage:

Specify the hazardous condition (source of unsafe energy or hazardous material):

Specify the unsafe act:

Discussion

Direct Causes—Energy Sources or Hazardous Materials

Discuss the specific energy sources (e.g., moving object or machine part) or hazardous materials, including how and why the sources or materials resulted in injury or property damage:

Indirect Causes—Unsafe Acts or Hazardous Conditions

Discuss the normal or expected safe work conditions and practices, and the deviations from such conditions and practices that resulted in the injury or property damage:

Basic Causes—Management Policies, Personal or Environmental Factors

Was injury or damage caused by employee's willful misconduct, intoxication, or intent to injure self or another? ☐ Yes ☐ No

If yes, describe (use additional paper).

Was the incident a result of violation of established safety policies?

☐ Yes ☐ No

If yes, explain (use additional paper).

Has the employee received training to perform this procedure safely?

☐ Yes ☐ No

If no, explain (use additional paper).

Was adequate personal protective equipment provided for the required tasks? ☐ Yes ☐ No
If no, explain (use additional paper).

Are changes necessary in the operations or procedures to prevent this type
of incident in the future? ☐ Yes ☐ No
If yes, explain (use additional paper).

Discuss any additional policies, personal factors, and environmental factors that led to hazardous
conditions or unsafe acts:
